

The Firm

Since many years we are working in the field of industrial property right. It was and is our endeavour to consult and support our clients extensively in questions concerning patents, utility models, designs, trademarks and licenses as well as questions concerning unfair competition and the related fields of copyright thereof.

In May 1997 we decided to found our own firm and to join to a partnership.

Our office is situated in the very centre of Munich at the historical Sebastiansplatz. At this place, which was mentioned in the Chronicles of Munich for the first time in 1572, in neighbourhood to dyers and tanners the guild of soap boilers had established their business. Here far into the twentieth century soap was produced. Today the houses, redeveloped according to historical patterns, serve for stylish life and as a place of commercial arts and crafts in all it's various facets

We are thus in direct succession to middle-class and industrial trade and business.
